	The MAILING DATE of this communic	cation appea	ars on the c	over sheet with the co	orrespondence ad	dress			
Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status

Art Unit: 2878

Response to Amendment

1. The amendment filed on November 6, 2003 has been entered.

Election/Restrictions

2. This application contains claims 1-11 and 31-35 drawn to an invention nonelected with traverse in Paper No. 5. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 5. Claims 12-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Youden (US Patent 6,340,820).

Art Unit: 2878

6. Regarding claims, 12-13, 15-16, 18-19, 21-26, 28-29, Youden discloses a light detection method and device having a transparent and opaque region for detecting IR radiation comprising (Column 3, lines 46-51):

forming a substantially transparent IR detection medium (element 240);

forming a substantially opaque IR detection medium (element 235, Column 5, lines 58-59);

mounting the substantially transparent and opaque IR detection medium on a substrate (See Figure 2);

wherein the substrate includes a laser safety warning information. (see Figure 2B). Youden discloses using a phosphor and not a chromophore dye, but it would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a chromophore dye instead of a phosphor, since it has been held to be within the general skill of a working in the art to select a known material on the basis of it suitability for the interned use as a matter of obvious design choice. *In re Leshin*, 227 F 2d 197, 125 USPQ 416 (CCPA 1960).

Regarding claims 14, 17, 20, 24, 27, 30, Youden does disclose mounting the detector onto a substrate (Column 3, lines 11-12) but does not specifically disclose that the substrate is made of cardboard. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a cardboard substrate, since it has been held to be within the general skill of a working in the art to select a known material on the basis of it suitability for the interned use as a matter of obvious design choice. *In re Leshin*, 227 F 2d 197, 125 USPQ 416 (CCPA 1960).

Response to Arguments

7. Applicant's arguments filed 10/14/2003 have been fully considered but they are not persuasive.

The examiner finds the applicant's argument that the invention includes a chromophore dye and not a phosphor, not persuasive. Although they are different materials, chromophores are types of fluorescent/phosphorescent materials. Therefore, one of ordinary skill in the art would have been motivated to use a chromophore or other fast response material, should the need arise. Therefore as stated above, it would have been obvious to one having ordinary skill in the art to select a known material on the basis of suitability for the interned use as a matter of obvious design choice.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
